

# Maven

## **JUNIOR INDEX REBALANCE TRADER**

Founded in 2011, the Maven organisation engages in proprietary trading & market making activities across global financial markets. Its offices are based near Liverpool St Station in central London and the organisation has over 60 employees.

Maven is looking for a Junior Index Rebalance Trader to join a current team of two on the index rebalance portfolio. This is a full-time permanent position and will be based in London.

Remuneration comprises of an annual base salary, benefits and discretionary bonus.

### **ROLE SPECIFICATIONS**

- Trading Index rebalances;
- Supporting senior traders on Index rebalance desk with research and execution-trading; &
- Performing trade analysis and index analysis when required.

### **CANDIDATE SPECIFICATIONS**

Required:

- Either minimum 3 years' experience in index analysis or 1 year experience trading index rebalances;
- Be a motivated, original-thinker, able to work well within a lean, cohesive team;
- Have the flexibility to cover different market hours; &
- Have achieved a minimum 2:1 in a mathematical subject from a reputable university.

Desirable:

- Experience in programming (Python, R or C#) and knowledge in SQL; &
- Experience managing large datasets and statistical models.

To apply for this role, please send your CV and cover letter to [hr@mavensecurities.com](mailto:hr@mavensecurities.com).
